Connecting the power

Check the power cord, power plug, socket on the chair, main power switch, controller are unbroken for the first time use or use after long time storage. Then plug power cord.

Confirm the fabric

Make sure if the fabric is damaged according to the following procedures before use.

- ① Open zipper and back cushion from one side
- ② Put your hand between cushion and backrest to see if the fabric is damaged.

CAUTION

Before using the chair, confirm that whether there is damage in the material of the armchair or of other parts. In case of damage, even the smallest tearing in the chair, please stop using it immediately, turn off the power switch, unplug the chair, and contact the customer service center. Never use the armchair with dismantled cushion or damaged material, otherwise there will be serious safety hazard.

Adjusting massage chair

Sitting in the chair

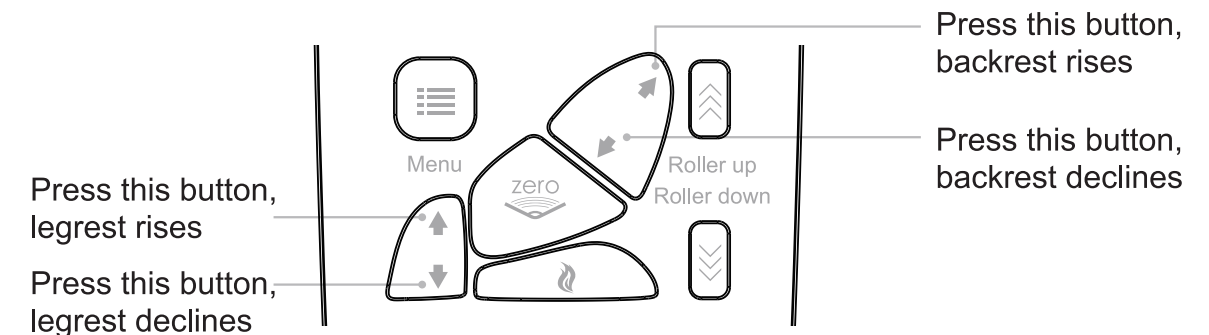

Under general circumstances, the rollers are laid folded at the upper position of the backrest, besides, legrest declines to its lowest position. Please ensure the position of the rollers and legrest. If the rollers and legrest are laid other place, restart the chair, keep on waiting for the parts return to its initial position, then sit in the chair slowly. After using, slowly step out of the chair.

CAUTION

- Do not sit in the chair when legrest is rising, or after legrest rises, it may result in accident or reclining chair, causing personal injury.
- Raise the chair before using. Enjoy the massage from light massage course. Adjust the angle of your reclining angle according to your body figure.
- Do not stand on the legrest, it will break the legrest or even the whole chair.

Adjustment of chair angle

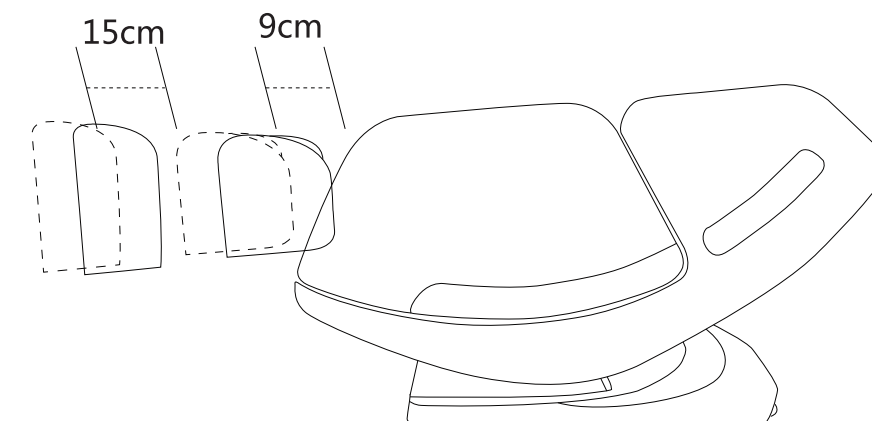

WARNING

When adjusting the Angle of the massage chair, please make sure there are no people around (especially children) or pets. In addition, please ensure that there is about 37cm left in the front of the massage chair and more than 9cm left in the back, and there is no foreign body blocking in the movement path of the massage chair.

Adjustment of legrest

Legrest can be lengthened if feet can not extend well. It can be lengthened by 240mm.

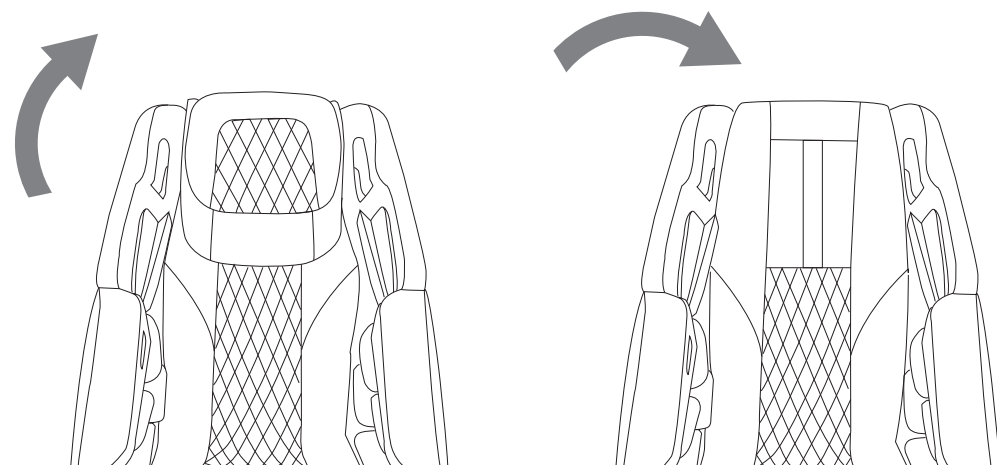

WARNING

When lowering legrest, make sure there is no person (especially children) or pet around. Besides, hands or other object can not get stuck under the legrest.

Adjusting the pillow

- If massage intensity of neck needs to be strengthened, Please unzip the headrest, take the headrest off.

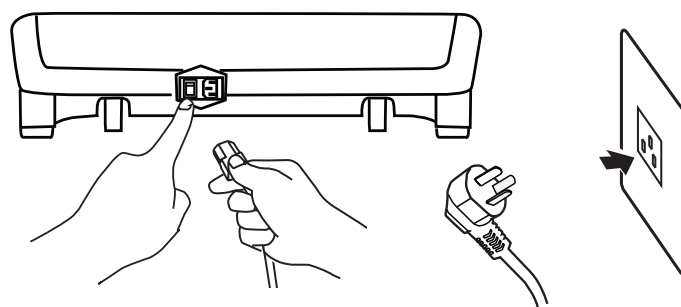

CAUTION

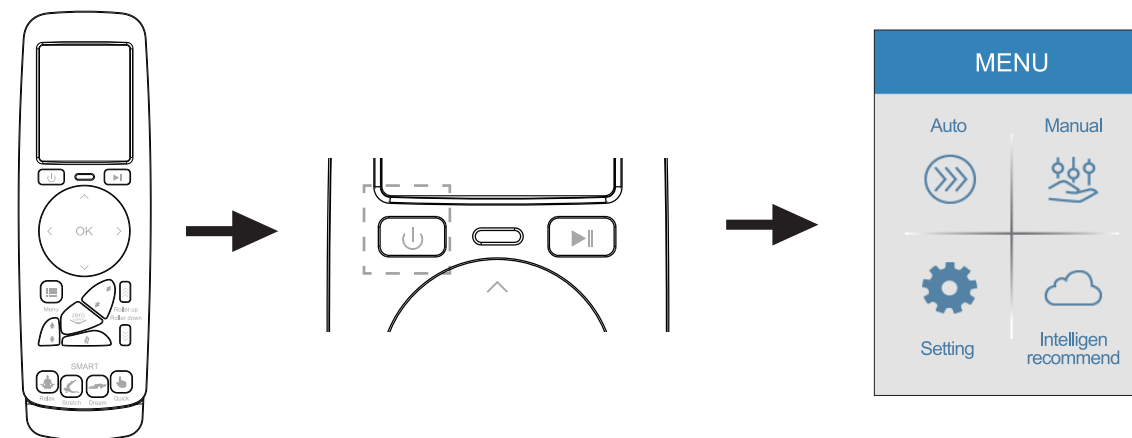

When pillow is folded, massage intensity of neck is strengthened, please keep massage time within 15 minutes.

Troubleshooting

If there is still a problem after trying the solutions given in this troubleshooting guide, stop using the chair immediately to prevent accident or injury, and unplug the power plug from the wall outlet. Contact the vendor or your nearest service center for assistance.

Problem	Causes and troubleshooting	
The right and left rollers are out of alignment.	<div>The rollers are designed with an alternating tapping mechanism, so in the stopped position they are sometimes out of line. This is part of the design and is not a malfunction.</div> <div></div>	This is part of the design and is not a malfunction.
The roller moved to the bottom and stopped	<div>The auto timer will cause the rollers to move up to the bottom of the chair when the massage time is finished, so as not to interfere with your movements when getting out of the chair.</div>	
Noise during chair operation	<div>Noises during tapping Sound of the rollers rubbing against the seat cover during kneading Sound of raising and lowering the rollers, sound of roller operations Sound of the air massage cushions Sound of the air pump Sound of air discharge Sound of raising and lowering the Reclining Seat Back</div>	
The rollers stop during the massage.	<div>Sometimes when there is too much pressure to the rollers, they can stop moving temporarily. Slightly lift your body or lightly raise the Reclining Seat Back. (Be especially careful when a person who weighs 100 kg (220 lb) or more uses this chair)</div>	If there is still a problem after the check, stop using the product immediately.
No power or the chair can't work after pressing the button	<div>Check for the following: ① Is the power cord fully plugged into the wall outlet? ② Is the main POWER switch located at the front right of the chair set to ON? ③ Are you pressing two buttons at the same time?</div>	
Abnormal heating on power cord and plug	<div>Stop using immediately.</div>	
<div>Contact the vendor or your nearest service center.</div>		
<div>Anyone other than an authorized service person must not repair or disassemble.</div>		

Safety check

Regular Maintenance Will Preserve the Life of Your Chair

Have you experienced any of these problems?

- The chair does not start with the Main POWER switch set to ON.
- The power cord has been cracked or scratched.
- The power cord or plug becomes abnormally hot.
- The chair produces a burnt smell, abnormal sound or vibration.
- The auto timer function does not work in some cases.
- Other failures.

If you find anything listed on the left, stop using and unplug the power cord from the outlet to prevent failure or an accident. Be sure to contact the vendor or our service center for maintenance.

To use safely

The chair fabric (roller fabric) is a consumable part, and its service life is 3 years (conditions of use: two 15-minute sessions a day, every day).
For safe use, periodic inspection by the vendor is recommended before the end of its service life.
*Durable years vary depending on conditions of use.
* After about five years of use, a professional inspection is recommended even if there are no symptoms or problems. For inspection fees, contact the vendor.

Storage and care

Storage

- After cleaning the dirt and dust, place the chair in a dry place
- If the chair is left unused for a while, please cover the chair to prevent from dust.
- Pets sometimes chew on power cord, so try to keep the pets away from the chair even when it is stored.

CAUTION Do not install the chair where it can come into contact with direct heat, such as direct sunlight or a radiator.

Care and Maintenance

CAUTION ● When cleaning the chair, be sure to unplug the power plug from the wall outlet first. Do not plug or unplug the power plug with wet hands.

[Caring for the Back Pad and Covers]
Soak a piece of soft cloth in lukewarm water in which a small amount of mild detergent has been added. Then thoroughly wring it out before cleaning off any spots or grime.

CAUTION ● The fabric color can change if the chair is in contact with vinyl covers or wall coverings for a prolonged period of time.

[Caring for Other Plastic Parts]
Soak a piece of soft cloth in lukewarm water in which a small amount of mild detergent has been added, thoroughly wring it out, and clean off any spots or grime. Then wipe with a dry cloth so that no detergent residue remains.

CAUTION ● Do not use alcohol-based or other household cleaning products or abrasives because they can scratch or crack the finish or cause color to fade.

[Caring for the Remote Control]
Wipe dirt off the remote control with a dry cloth.

CAUTION ● Never use a moistened or wet cloth. May result in a mechanical failure.
